Site Control

- Contaminant Control
- Decontamination
- Site Security

Site Control

- Contaminant Control
  - Work Zones
    - **Exclusion Zone** – All contaminated material handled in the exclusion zone. Equipment and personnel become contaminated
    - **Contamination Reduction Zone** – Personnel and equipment enter dirty and exit clean
    - **Support Zone** – Area outside the CRZ designated to support cleanup operations. Remains uncontaminated.

Site Control

- Decontamination
  - Equipment decontamination area
    - Sized to fit equipment
    - Control waste water
    - Rigorous enough to knock off contamination

Site Control

- Decontamination
  - Personnel decontamination area
    - Equipment to perform gross decontamination
    - Area to remove and dispose contaminated PPE
    - Equipment for hand and face wash
    - Area for putting on street clothes
    - Highly toxic contaminants, radioactive isotopes or carcinogens may require showering.

Site Control

- Site Security
  - Fencing, barricades or signs to keep the wandering public out
  - Traffic flow one way into exclusion zone
  - Traffic flow one way out of exclusion zone through the CRZ
  - Keep record of site workers and visitors
  - Train new site workers and visitors on site lay out as appropriate.
